

## ABC3 Overview

The course materials include both a 244-page full color manual and interactive "courseware". The manual is your textbook, and the "courseware" is your virtual instructor. Both cover the same topics but each in its own way. The manual includes extensive diagrams, graphics and boating tips. The courseware is narrated and interactive, making use of animation, video, and sound. Both manual and courseware provide review questions so that you can verify that you truly understand the material. In addition to the lessons, the courseware includes resources which will come in handy long after you have completed the course: printable forms (checklists, accident reports, float plans, etc.) and links to reference documents such as the Navigation Rules.

NYS Certification requires a 8-hour classroom instructor taught course. This one-day program meets that requirement.
